Abstract

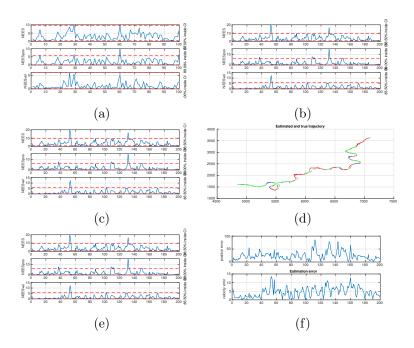

This report will highlight and discuss the results of the three graded assignments for the course TTK4250 Sensor Fusion. The code implemented was tested and tuned for both simulated and real datasets.

Contents

1	Introduction	1
2	Graded Assignment 1	2
3	Graded Assignment 2	3
4	Graded Assignment 3	4
5	Conclusion	5
Re	References	

1 Introduction

2 Graded Assignment 1

3 Graded Assignment 2

An error-state Kalman filter was implemented in MATLAB. For the relevant theory behind the implementation, see [2] and [1].
